

Façade clinker brick formats

The format of each individual brick plays just as important a role in shaping the appearance of a façade as the brick's colour, surface and jointing. A multitude of small-format clinker bricks give façades a vibrant and colourful appearance, while using larger clinker brick formats results in calmer and more structured aesthetics.

(All dimensions are specified as length x width x height. Special formats, half clinker bricks and split clinker bricks, as well as the dimensions of clinker brick slips, are available on request.)

Normal format
(NF) 240 x 115 x 71 mm

Double thin format (2DF)
240 x 115 x 113 mm
